PROFESSIONAL SUMMARY: Senior React Developer with 6.5+ years of experience building scalable enterprise web applications using React, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand, Context API, and Node.js. Experienced in React 19 migrations, performance optimization, REST API integration, authentication, unit testing, AI-assisted development with GitHub Copilot, and Agile delivery. Proven ability to modernize enterprise applications, mentor developers, and deliver production-ready solutions for clients including eBay, Comcast, and banking platforms.

SKILLS:

- Frontend: React, Next.js, Redux, Zustand, TypeScript, JavaScript, MUI, Bootstrap, Tailwind CSS, CSS-in-JS, SASS, LESS.
 - Backend: Node.js, MongoDB, gRPC, Kafka.
 - Tools & Platforms: GitHub, Git, Visual Studio, Eclipse, Postman, Firebase, Rancher, Jira, GitHub Copilot (AI-assisted coding) and basics of Azure.
 - Others: Camunda, Zeebe, REST APIs, Microservices, Shell Scripting.
-

EXPERIENCE:

Consultant (Senior React Developer), eBay (via Flexton Inc), Mar 2026 – Present

- Migrated 5 React applications from React 16/17/18 to React 19 within 3 months, ensuring smooth upgrades and application stability.
- Developed reusable AI-driven migration workflows that accelerated React 19 upgrades across five applications, reducing manual effort and standardizing the migration process.
- Performed build verification, unit testing, regression testing, and functional testing to ensure all migrated applications were production-ready.

Custom Software Engineering Senior Analyst (Senior React Developer), Accenture, July 2024 – February 2026

Project: DSS Dotcom2 – A web application used to manage Comcast Xfinity features such as user settings and profile information.

- Leveraged GitHub Copilot and GenAI tools to automate test-case generation and authored Copilot Guidelines to standardize AI-assisted code reviews, reducing development and review time by 20% while improving team consistency and productivity.
- Designed and implemented reusable UI modules using React and Tailwind CSS, reducing development time for new features by ~25% and improving code maintainability.
- Introduced Zustand for shared UI state management, reducing unnecessary re-renders and improving application performance.
- Wrote comprehensive unit and integration tests for the components using Jest and React Testing Library, validating login redirects, token handling, and authenticated UI behavior.
- Collaborated with cross-functional teams to refine technical solutions, estimate user stories, and drive successful sprint deliveries in an Agile environment.

Lead Developer (React Lead), Tecnotree Convergence Private Ltd, May 2022 – July 2024

Project: Digital Resource Manager – Application for managing MSISDN, SIM, and modem resources.

- Designed and developed reusable, high-performance React components using React.memo, useCallback, and code splitting to improve rendering efficiency and maintainability.
- Migrated workflows to low-code solutions using Camunda and Zeebe, and built Node.js REST APIs with gRPC-based microservice integration.
- Mentored 5+ junior developers in JavaScript, React, and Node.js, accelerating their onboarding and productivity.
- Integrated Azure Active Directory authentication with MFA, strengthening enterprise-grade security and access control.

Digital Engineer, Centrico India Private Ltd, Mar 2020 - April 2022

Project: HomeBanking – Banking application for managing customer and account data.

- Developed and enhanced frontend features using React.js while contributing to backend services with Java Spring MVC, delivering end-to-end banking functionality.
- Debugged and resolved issues across UI and backend layers for smoother user experience.
- Contributed to feature enhancements and maintenance to ensure application stability

Project: Onboarding-Onesella – Web application for customer account opening and card onboarding.

- One of the three core developers responsible for building the application from scratch, delivering reusable React modules and business features through a successful production launch.
- Configured Webpack, modularized React code with shared reusable modules, and delivered the application end-to-end through a performant and reliable production launch.

Software Engineering Intern (Fellowship Program), BridgeLabz Solutions, October 2019 – February 2020

- Developed FundooNotes, a Google Keep-inspired web application from scratch using React.js, JavaScript, HTML5, CSS3, and Firebase, implementing authentication, CRUD operations, labels, reminders, and responsive UI.
- Built reusable React components, integrated Firebase Authentication and REST APIs, and gained hands-on experience in component-based architecture, state management, debugging, Git, and Agile development

CERTIFICATIONS & PROJECTS:

- Advanced Certificate in Data Science – IIIT Bangalore
- GenAI for Web Development – Coursera
- MERN Stack Full Guide – Udemy
- GitHub Portfolio: <https://github.com/Girish-Br> .

EDUCATIONAL QUALIFICATION:

BE, Information Science — Visvesvaraya Technological University (2019)

PUC, PCMB — SPSM College, Davanagere (2015)

SSLC — Sri Gurudeva High School, Kottur (2013)
